HANDMADE BOATS

#### **Introduction to Alumax Boats**

Discover Alumax Boats, the specialist in developing, constructing, and delivering aluminum boats from the Netherlands. Globally renowned as the supplier of the famous aluminum Watertaxis in Rotterdam, we also offer tour boats in cities like Amsterdam with its famous canals and the picturesque Delft. Our expertise in emission-free navigation reflects the reputation of the Netherlands as a leading boat-building country. Even the King of the Netherlands has visited Alumax, emphasizing our quality and craftsmanship.

The interior of the Waterbus Fifty is cleverly designed and offers great flexibility. From a convenient bus layout to the option to transform the rear section into a dance or presentation floor, the possibilities are versatile. Additionally, there's space for cocktail tables, while a convenient restroom in the middle of the boat ensures extra comfort. But that's not all! The Waterbus Fifty comes equipped with a range of

options, including navigation lights, a hydraulic roof structure, interior lighting, and an AIS transponder.

With a clearance height of just 1.30 m, this electric-powered Waterbus Fifty is an innovative choice on the water, providing access to places only open boats can reach. In summary, the Waterbus Fifty has everything you need for an enjoyable boating experience

# BENEFITS OF ALUMINUM

Aluminum, the core material of our vessels, is known for its durability, lightweight construction, and strength. And it's low maintenance, saving valuable time. Combined with electric propulsion, our boats offer environmentally friendly and quiet navigation, making them ideal for use in urban waterways and natural environments. With a lower environmental impact and reduced noise pollution, you'll enjoy a comfortable and environmentally conscious experience on the water.
