

ALUMAX BULLIT 600 BULLIT 660

BULLIT 660 OUTBOARD

The Bullit 660 outboard is an aluminum lightweight boat and offers boating fun for the whole family. The tender boat is 6.60m long and 2.46m wide. The draft is 0.60m and the headroom 1.12m. The hull weight is 880kg and the design category is C.

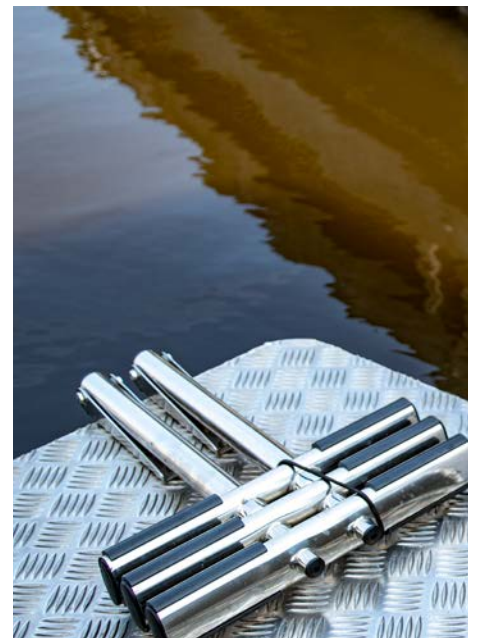

The lightweight aluminum tender is characterized by excellent sailing characteristics, stability and space. An advantage of aluminum boats is that they are low maintenance, they can remain in the water during the winter and freeze if necessary. Above all, aluminum is foolproof, because it is not broken. This makes our boats resistant to vandalism.

The Bullit 660 is multifunctional, therefore this aluminum boat is also used as a workboat with various extras for the desired use.

All Alumax boats have self-draining valves in the hull so that water can easily drain out of the boat. Very handy for cleaning the boat!

BULLIT 600 OUTBOARD

The Bullit 600 outboard is an aluminum lightweight boat and offers boating pleasure for friends and family. The tender boat is 6.00m long and 2.15m wide. The draft is 0.40m and the headroom 1.12m. The hull weight is 600kg and the design category is C.

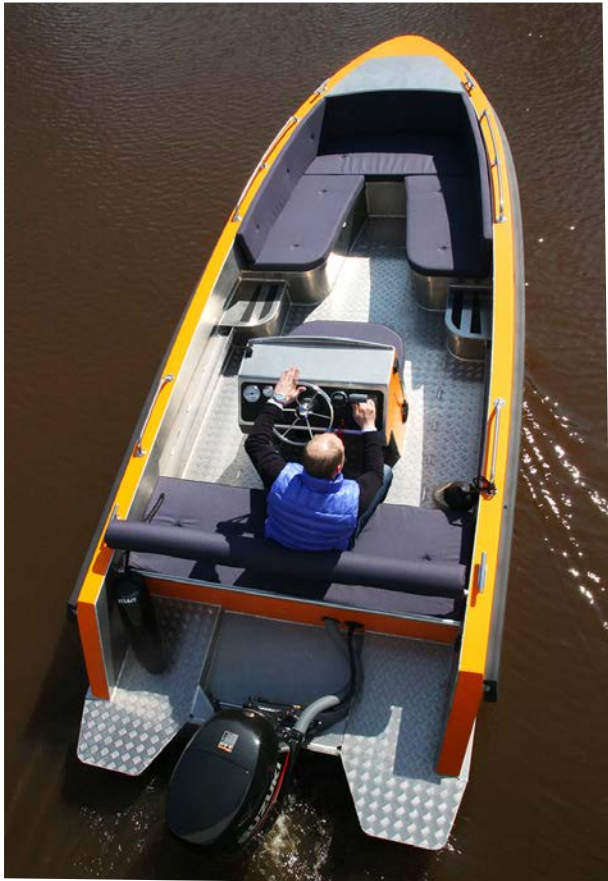

The lightweight aluminum tender is characterized by excellent sailing characteristics, stability and style. An advantage of aluminum boats is that they are low maintenance, they can remain in the water in winter and freeze if necessary. Above all, aluminum is foolproof, because it is not broken. This makes our boats resistant to vandalism. The Bullit 600 is

multifunctional, which is why this indestructible aluminum boat - with the necessary modifications - is also used as a work boat. Think of fireboats, patrol boats or enforcement boats.

All Alumax boats have self-draining valves in the hull so that water can easily drain out of the boat. Very handy for cleaning the boat!

ARE YOU BULLIT PROOF?

The Bullit series consists of 6 indestructible, self-draining and maintenance-free tenders. The aluminum boats are designed and built at our yard in Meppel and promote carefree boating pleasure. Available with inboard diesel engine, outboard gasoline engine or an electric motor. Because aluminum is much lighter than for example a comparable

polyester sloop, they can also sail much faster. The Bullit series is designed for these speeds. They remain flat and above all stable sailing, so you do not have to stand. Moreover, they are easy to trailer. Are you going to cast off the ropes?
