

## Bullit 660

inboard

The Alumax Bullit 660 inboard is an undisputed lightweight. The light aluminum tender has a remarkably shallow draft and yet has excellent sailing characteristics and an unprecedented stability.

The Bullit 660 can easily be left in the water during the winter and frozen if necessary.

The V-bottom with spray rail ensures that no spray water enters the boat. The self-draining tear plate floor allows water to drain naturally from the boat without pumps or electricity. The boat is also equipped with steps on both sides and has plenty of storage space.

All inboard versions come standard with a 60 litre fixed fuel tank and water-lubricated propeller shaft system, water-damped exhaust system with water lock, starter battery with double main power switches, underslung rudder with protective heel and mono-cable steering with stainless steel steering wheel, engine room fitted with sound insulation, throttle and shift control by means of a top-mounted throttle lever and all associated clocks and gauges mounted in the dashboard.

## Standard version

16 HP Vetus diesel engine, V-bottom with spray rail, self-draining tear plate floor, double bottom with air chamber, foredeck with anchor locker, U-shaped bench in the front of the boat with storage space, steering console with storage space and seating area at the front, aft bench with storage space, aluminium railing and 4 bollards, integrated swimming platforms, trailer eye on the bow and anode on the underwater hull, solid rubber bumper.

All hatches are provided with latches, hinges and discharge tubes. The entire boat is welded from seawater-resistant aluminium and is delivered complete with owner's manual and CE mark.

## Specifications

Length (among others)

6.60 meters

Width (among others)

2.46 meters

Depth

0.60 meters

Engine

Up to 170 hp

Clearance height

1.12 meters

Hull weight

880 kilogram
