

## Bullit 720

outboard

The Alumax Bullit 720 Outboard is undoubtedly lightweight. This aluminum tender has a surprisingly shallow draft yet boasts excellent sailing performance and unmatched stability. The Bullit 720 can stay in the water over winter and even freeze if necessary.

Every Bullit that leaves the Alumax workshop is welded. The installation technique and finishing touches are purely handcrafted. One hundred percent Dutch top quality. The production process is flexible, allowing us to offer custom solutions.

### Standard configuration

V-shaped hull with spray rail, self-draining diamond plate floor, double bottom, foredeck with anchor locker, U-bench in the bow with storage, steering console with storage and front seating, sit/stand bench with storage converting to sunbed with storage, aluminum railing and 4 bollards, 2 integrated swim platforms, trailer eye on the bow, and anode on the underwater hull, solid rubber bumper, double spray rails on the underwater hull, and a hull with 6 bollards. All hatches are fitted with latches, hinges, and drainage pipes. The entire boat is welded from seawater-resistant aluminum and comes with an owner's manual and CE certification.
